1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-6, 8-10, 12-17 and 23-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wheeler et al (5,258,197).

Applicant is referred to the reasoning set forth in paragraph No. 3, Paper No. 072804.

3. Claims 18-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grey et al (5,192,262) in view of Wheeler et al (5,258,197).

Applicant is referred to the reasoning set forth in paragraph No. 4, Paper No. 072804.

4. Applicant's arguments filed April 25, 2005 have been fully considered but they are not persuasive. Wheeler et al specifically discloses that applicant's claimed triacylglycerols can be used as fat replacers in chewing gum (column 14, lines 11-15 and 29; column 17, lines 61-66 and column 18, lines 27-32). Thus, Wheeler et al clearly provides motivation for using these triacylglycerols in chewing gum, despite applicant's contention to the contrary. Gum products are simply produced by using conventional procedures while substituting the claimed triacylglycerols in whole or in part for the fat typically used in preparing chewing gum. Applicant's remaining gum components, as

Art Unit: 1761

claimed in several dependent claims and including an elastomer (claim 1), are conventional gum components according to pages 1 and 2 of applicant's specification.

When Wheeler et al is combined with Grey et al, there clearly exists motivation for substituting Wheeler et al's triacylglycerols for the triglycerides used in Grey et al, viz. lowering the calorie and fat content of Grey et al's chewing gum, which is a desirable dietetic goal for many consumers. Similar reasoning was found to apply by the Board of Appeals in Appeal No. 2000-1104 for parent S.N 08/849, 292.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
